

SFP-SCH-V Shingle Cable Holder

Description

The SnoFree™ SCH Shingle Cable Holder Valley system is a low cost method to control any ice dams that would form in a valley with asphalt shingles, wood shakes, standing seam metal. The SFP-SCH-V will create open sections for water to safely flow from through the valley without the possibility to refreeze over unheated portions of high flow areas. The shingle cable holder system gives an aesthetic look compared to standard serpentine heat cable in a valley application while keeping a cleaner method to eliminate ice dam issues. All SFP systems come standard with a durable 30 year Kynar finish to match most desired looks.

- Beautifully heats the roof while keeping the intended look of the roof.
- Simple to access.
- Attractive and completely hides the heat cable for added protection.
- Simple to Install
- Available in 24 ga. Kynar Steel, Aluminum, Cor10, Copper, Etc.
- Works great for eaves.

Applications

For all buildings with a pitch greater than 4/12

For new roof installations:

Asphalt Shingle
Wood Shake Shingles
Tile or Slate Roofs
Standing Seam Metal

For installation on existing roofs:

Asphalt Shingle
Wood Shake Shingles
Standing Seam Metal
