

SFP-V New Valley Panel

Description

The SnoFree™ 4" or 6" Valley Panel is an efficient method to control any ice dams that would form within a valley. Effectively clearing both sides of the valley between 6"-10". The SFP-V panel will create all the open area for water to safely flow from the valley without the possibility to refreeze over unheated portions of the roof. The SnoFree™ heated panel system gives an aesthetic look to any structure while keeping a more efficient and cleaner method to eliminate ice dam issues in a valley or dormer. All SFP systems come standard with a durable 30 year Kynar finish to match most desired looks.

- Effectively controls Ice and Snow with 4 Passes of Cable
- Cable requirements as recommended.
- Heats more than 10" of each side of the valley.
- Comes with a 30 Year protective Kynar finish.
- Sheet metal pieces come in 48" widths for ease of handling.
- Minimal exposed fasteners for better roof membrane protection.
- System Parts List:
 - 2—Aluminum Extrusions (4" or 6")
 - 1—SFP 24 ga. Kynar Steel Base
 - 1—SFP 24 ga. Kynar Steel Valley Connector
 - 2—SFP 24 ga. Kynar Steel Caps
 - 2—SFP 24 ga. Kynar Steel Expansion Joint

Applications

For all buildings with a pitch greater than 4/12

For new roof installations:

- Asphalt Shingle
- Wood Shake Shingles
- Tile or Slate Roofs
- Standing Seam Metal

Key Sections

1. Chosen Roofing Material
2. SFP-12 Cover (Left Side)
3. SFP-12 Cover (Right Side)
4. 4" Extrusion with 2 Passes of heat cable on both sides of the valley.
5. SFP-4V Valley Base
6. Fascia and Existing Drip Edge
7. 2806-R / 6 Watts per Foot Heat Cable\
8. Full Roof Water Barrier
